SEAN PAUL ALAN A. ARNADO

A problem seeking computer science student with a strong foundation in backend development and software systems.

Eager to apply technical skills in a challenging role within the tech industry.

Experienced in software development, version control, and PC hardware repair through academic projects and personal hobbies.

Skills

Software development

- Experienced in backend development with a focus on clean, modular code.
- Familiar with structuring APIs and managing databases (e.g., MongoDB, PostgreSQL).
- Comfortable working with Node.js, Express, and other related backend tools.

PC building and repair

- Builds and customizes PCs as a hobby.
- Versed in diagnosing hardware issues and performing component-level repairs (e.g., soldering).
- Studious in learning how hardware and software functions interplay with one another.

Version Control & Collaboration

- Proficient in using Git and GitHub for version control and team collaboration.
- Experienced with branching strategies, pull requests, and code reviews.
- Familiar with agile development practices and task management tools (e.g., Trello).

Educational Background

University of Mindanao
Bachelor in Computer Science
– Ongoing

Vicenta C. Nograles National High school
Senior highschool diploma with high honors
— 2022

Languages and Tools

- Java
- JavaScript
- TypeScript
- Python
- HTML
